> SUMMARY

Android Developer with 8+ years of experience shipping production apps (500K+ downloads), AOSP firmware, and fintech solutions. Specialized in Kotlin, Jetpack Compose, and Kotlin Multiplatform, with a track record of leading small teams and owning projects end-to-end.

> PROFESSIONAL EXPERIENCE

Android Analyst - 2 (AI Projects)

[Infocusp Innovations](#)

- Engineered an Android LLM evaluation pipeline to benchmark model capabilities.
- Enhanced security, navigation, and user experience for the [Cusp Money](#) personal finance app.
- Optimized an AI vibe-coding platform, boosting app quality and system stability by resolving key bugs.

Lead Android Developer

[Evince Development \(CMMI Level 3 Certified\)](#)

- Led delivery of [20 AOSP Android apps](#), 2 firmware builds, and [4 kiosk device solutions](#).
- Acted as primary client contact, translating requirements into technical specs.
- Built shared UI across platforms using Kotlin Multiplatform & Compose, cutting duplicate code.
- Managed a 2-person team across 3-4 concurrent projects.

Senior Android Developer

[Light Link Solutions](#)

- Built the [Tileswale app](#) (500K+ Downloads) using [Jetpack components](#) best practices.
- Gained hands-on experience with MVVM, Navigation, LiveData, Room, and more.
- Improved app performance, UI consistency, and code maintainability.
- Contributed to a feature-rich, scalable app now live on the Play Store.

Android Developer

[EsJay IT Solutions Pvt. Ltd.](#)

- Developed secure fintech apps including [Agent Center](#), [Balance Center](#), and [Complaint Box](#).
- Used anti-reverse engineering and Jetpack MVVM to deliver key banking features.
- Secured data with encryption, code obfuscation, and protected API communication.
- Worked with backend and QA teams to ship fast, scalable financial apps.

Junior Android Developer

[uBrain Studios Pvt. Ltd.](#)

- Started Android development with core concepts: Activities, Fragments, RecyclerView.
- Built [Desh Parivahan](#) & [Moozy](#) apps with UI and API integration.
- Worked with Firebase, REST APIs, and local storage (Room/SQLite).
- Improved debugging, Git usage, and team collaboration skills.
